

The Unique Radar Key Company Gold Standard Keys

Opens all the existing locks with the ultimate ease and reliability. Improved design, manufacturing and keycutting.

UNIQUE raised edges on smooth ergonomic handle for maximum grip and leverage - The opposite of having a thickened centre which tapers down to sharp edges

One-piece SOLID BRASS keyblank eliminates the possibility of handle weakness or sharp weld-flash at this point

SUPREMELY ACCURATE KEYCUTTING SUPREMELY RELIABLE KEYCUTTING

Our purpose built, computerised key cutting machines UNIQUELY allow extra machining operations, very specific rounding of the cuts and the tight tolerances which ensure reliable operation of our key in all the locks

DEPENDABLE QUALITY CONTROL

Every single key is tested by a master locksmith on two Radar toilet locks (not the much simpler, Radar Padlock)

Two enlarged keyring holes allow the user to individually tailor the extra leverage available from their keyring and other keys on their bunch

Octagonal shaft gives easy identification for partially sighted users.

Bevelled keystone for smooth key removal

One-piece solid brass keyblank eliminates possibility of flag weakness or excessive weld-flash, which can obstruct key insertion

Fully rounded nose to aid easy insertion

Disabled people depend on their Radar Key Company Gold Standard NKS key to certainly & effortlessly open what will be, the only accessible toilet which is nearby

Made in UK
